

SMS Consent Form

Written consent for named individuals at a client business to receive text messages from the AI Advantage assistant.
Completed and signed during client onboarding.

About the messaging program

AI Advantage provides an AI business assistant to its clients. Client owners and managers text the assistant directly from their own mobile phones to ask questions about their own business data, such as sales figures, top accounts and account activity, and receive a short answer back. The assistant also sends alerts they have asked for, such as a weekly summary or a notice that something needs their attention. Only individuals listed on this form are enabled to send or receive messages.

- Message frequency varies with how often you use it, and is typically a few messages per week.
- Message and data rates may apply.
- Reply STOP to opt out, HELP for help.
- Consent is not a condition of purchase and may be withdrawn at any time.
